

Bury 2030

"We aim to become the first post-industrial area to grow more quickly than the national average, but economic growth is only valuable if it helps people to grow. We must create not just full employment but also fully meaningful employment, with the genuine prospect of progress and promotion. Bury cannot be happy without growth that extends to all six towns and to all the people in them. This is an enterprise in partnership between the politicians, the professionals, the representatives of community, faith and voluntary organisations and - most importantly - the people of Bury"

Bury at the heart of the Northern Powerhouse and national productivity priorities: overview

- The Bury Strategy - a ten year plan for Bury people, place, innovation, infrastructure and business development which will contribute to NPH and GM Local Industrial Strategy.
- Our priorities for town centres and infrastructure for economic growth.
- Our priorities for turning round neighbourhood deprivation, closing gaps in healthy life expectancy, reducing in- work poverty and improving education and skills. What a Troubled Families way of working looks like when scaled up and mainstreamed.
- Bury's culture of enterprise, ideas and creativity
